

Tillandsia

Air Plant Care

by Fairy Garden Mother

There are two ways to water your Tillandsias.

The best way is to remove them from your terrarium twice a week and gently dip them in a cup of water several times. Turn them upside down and gently shake the excess water off before returning them. **Air plants don't like standing water in the crown because it can cause them to rot.**

Another way to water is to run them under a gently flowing faucet twice a week. Make sure the water is not too hot or cold.

Contact us if you have any questions: info@fairygardenmother.com

We book parties of 10 or more, "Build Your Own Airplant Terrariums" at your location.

We host "Build Your Own Fiber Optic Terrarium" by appointment.

We commission "Made to Order" terrariums by request.
